

AI Mastery — From Curious to Confident

A 5-Week AI Education Program | Spring 2026 | Honolulu, Hawaii

VERTICE SOCIETY × HONUVICE.AI

INSTRUCTOR: RYAN JACKSON, FOUNDER OF HONUVICE.AI

Welcome & Course Overview

"You've tried ChatGPT. You've asked it a few questions. But you're using maybe 5% of what these tools can actually do. This course unlocks the other 95%."

AI Mastery is a 5-week intensive designed exclusively for Vertice Society members. Every week combines real demonstrations, hands-on practice, and exercises tailored to your professional role.

Duration

5 weeks | ~3.5 hours per week

Format

Hybrid: Live Zoom + recorded content

Language

English instruction with Japanese support materials

Cohort

10-student exclusive Vertice cohort

Platform

HonuVibe LMS (learn.honuvibe.ai)

What You Will Learn

By the end of this program, you will have transformed how you work with AI — from casual user to confident power user.

→ **Navigate the AI Landscape**

Know the major players and which tool to use when — OpenAI, Anthropic, Google, Meta, and beyond.

→ **Write Advanced Prompts**

Master prompt engineering techniques that get dramatically better results from every AI interaction.

→ **Power Your Professional Workflows**

Use AI for drafting, analysis, research, and translation — tasks you do every single day.

→ **Build a Custom AI Assistant**

Create a personalized AI tool tailored specifically to your professional role — yours to keep.

→ **Analyze Documents, Images & Data**

Feed spreadsheets, reports, screenshots, and charts directly into AI for instant business insights.

→ **Future-Proof Your Skills**

Evaluate new AI tools as they launch and understand integrations and automations.

Weeks 1 & 2 — Foundation & Prompt Mastery

● WEEK 1 — LIVE SESSION

The AI Landscape + Foundation Reset

Get the big picture and reset how you think about AI.

- Map of the AI ecosystem: OpenAI, Anthropic, Google, Meta, Mistral, and open-source
- Why most people use AI wrong — the gap between asking questions and power use
- Mental model shift: AI as a thinking partner, not a search engine
- Hands-on setup: accounts on Claude, ChatGPT, and Perplexity configured for professional use

📺 WEEK 2 — RECORDED + PRACTICE LAB

Prompt Engineering That Actually Matters

Master the skill that separates casual users from power users.

- System prompts, role-setting, chain-of-thought reasoning, and structured output
- Transforming vague requests into precise, high-value interactions
- Practice lab: apply prompt engineering to your own professional tasks
- Bilingual strategies: prompting in Japanese vs. English

Weeks 3 & 4 — Workflows, Vision & Automation

● WEEK 3 — LIVE SESSION

Your AI-Powered Professional Workflow

See AI applied to the work you actually do every day.

- AI for executive communication: drafting, editing, translating, presentations
- AI for analysis: feeding documents, reports, and data for business insights
- AI for research: deep workflows that replace hours of manual work
- Live demo: complete workflow from raw information to polished deliverable

📁 WEEK 4 — RECORDED + PROJECT

Beyond Chat: Custom Assistants, Vision & Automation

Go beyond conversation. Build your own AI tool.

- Build a Custom AI Assistant for your role — yours to keep
- AI vision: analyzing images, charts, screenshots, whiteboards
- AI + spreadsheets and data: practical business demos
- Taste of automation: walkthrough of a simple AI-connected workflow
- Mini-app demo: Ryan builds a simple AI-powered tool in 20 minutes

Week 5 — The Cutting Edge + What's Next for You

● WEEK 5 — LIVE SESSION

Look ahead, share what you've built, and step into the future of AI with confidence.

AI Agents & Autonomous Workflows

What's real today and what's genuinely coming — cut through the hype with clarity.

Evaluate New AI Tools

A repeatable framework for assessing and adopting new AI tools as they launch.

Student Presentations

Share your custom AI assistant with the cohort — demonstrate what you've built.

Graduation & Community

Receive your certificate and join the HonuVibe AI community for ongoing learning.

Made with **GAMMA**

What You Will Receive

Every participant leaves with a complete toolkit — materials, tools, credentials, and community access.

Materials & Resources

- Prompt Engineering Workbook (EN/JP, 30+ templates)
- Professional AI Workflow Guide (EN/JP)
- AI Tool Comparison Guide (EN/JP)
- Lifetime access to all recorded sessions

Your AI Toolkit

- Custom AI Assistant built for your specific role
- Configured professional accounts on Claude, ChatGPT, and Perplexity

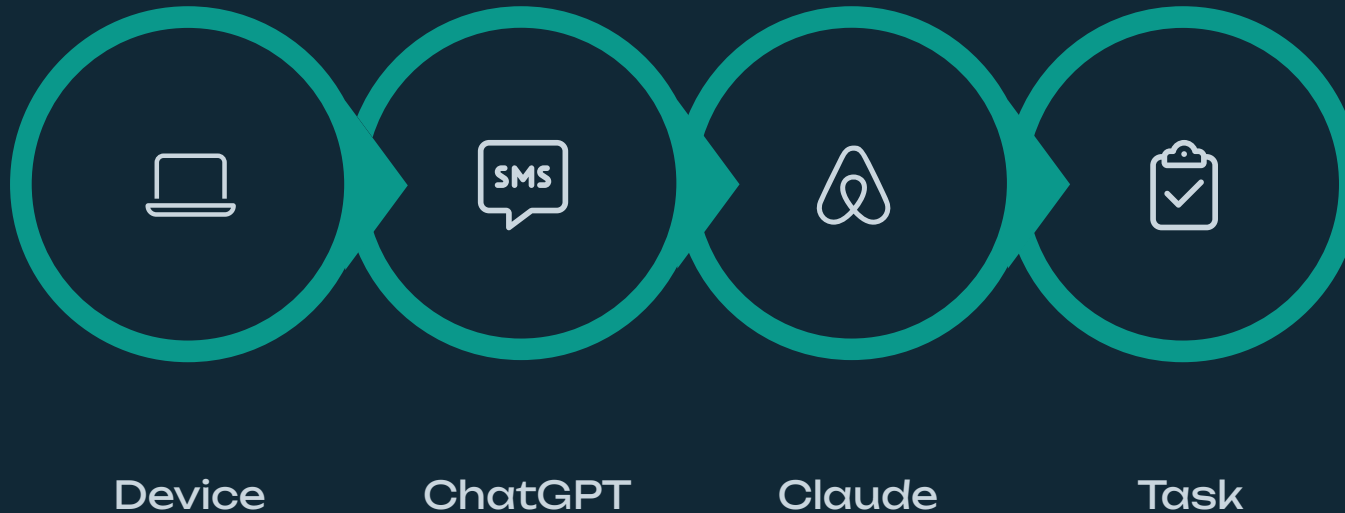

Community & Recognition

- Co-branded Certificate of Completion (Vertice Society x HonuVibe.AI)
- 30-day post-course community access
- Priority access to future HonuVibe courses

How to Prepare

No prior AI experience required beyond basic familiarity with ChatGPT. Setup instructions will be sent one week before the course begins.

 **You're ready to go.** If you can browse the web and send an email, you have everything you need to succeed in this program. We'll handle the rest together.

Your Instructor & The Partnership

Ryan Jackson

Founder, HonuVibe.AI | Honolulu, Hawaii

Ryan bridges American AI innovation and Japanese professional culture through bilingual programs and hands-on teaching. With an MBA, practical AI building experience, and a teaching philosophy grounded in Hawaiian aloha, he makes complex AI concepts accessible and immediately useful.

The Vertice Society

Founded 1996. An invitation-only English education community for elite Japanese professionals.

"Veritas Per Linguam" — Truth Through Language.

HonuVibe.AI

Hawaii-based AI education company named for the Honu — the Hawaiian green sea turtle, symbol of wisdom and patient navigation. Bridging US AI innovation with global professionals.

Together: A shared commitment to empowering Japan's most accomplished professionals with world-class education.

Questions & Contact

We look forward to learning together.
